# AMPL/ ACCESSORIES

ZONE

2 YEAR warranty

FAD + FPOS

FEATURES

▸ The FAD and FPOS modules are extensions to the AMPL module that gives you the possibility to control different models of traffic advisers. Each arrow model (lightbars, sticks) can be connected and controlled by those modules.

FLCOM

FEATURES

▸ The FLCOM™ module is a directional flashing arrow controller that is compatible with elevation mechanisms and fully programmable without the need for external equipment. It has a choice of 5 or 8 independent outputs which makes it compatible with most directional flashing arrows available on the market.

DISCRETION 2

FEATURES

▸ Relays module that gives you access to all relays terminals (COM, N.C. et N.O.) on a quick connect connector. All relays can be controlled simultaneously or independently by a simple dip switch configuration.

▸ Ideal to add power output or undercover (camouflage) output to turn off lights on emergency vehicle.
